- Program Overview
- Curriculum and Training
- Faculty and Mentorship
- Research and Scholarly Activities
- Application Process and Eligibility
- Resident Life and Support Services

Program Overview

The Mount Sinai Medical Center of Florida Program Internal Medicine Residency is a fully accredited training program designed to develop skilled internists capable of managing complex medical conditions across various healthcare settings. The program emphasizes a balanced approach combining inpatient and outpatient experiences, ensuring residents acquire comprehensive clinical skills. With a focus on evidence-based medicine and patient-centered care, the residency prepares physicians for board certification and successful careers in internal medicine or its subspecialties.

Program Mission and Objectives

The mission of the Mount Sinai Medical Center of Florida internal medicine residency is to provide an exceptional educational environment that promotes clinical expertise, professionalism, and lifelong learning. The program's objectives include training residents to: diagnose and manage a wide range of medical disorders, communicate effectively with patients and healthcare teams, engage in quality improvement and patient safety initiatives, and contribute to medical knowledge through research and scholarship.

Accreditation and Recognition

This internal medicine residency program is accredited by the Accreditation Council for Graduate Medical Education (ACGME), ensuring compliance with rigorous standards of graduate medical education. The program has received commendations for its commitment to resident education, clinical training, and faculty development, reflecting its status as a leading residency in the region.

Curriculum and Training

The curriculum of the Mount Sinai Medical Center of Florida Program Internal Medicine Residency is structured to provide progressive responsibility and diverse clinical exposure over the course of three

years. The program incorporates rotations in core internal medicine subspecialties, ambulatory care, critical care, and elective opportunities tailored to residents' interests.

Core Clinical Rotations

Residents rotate through essential internal medicine disciplines, including cardiology, gastroenterology, pulmonology, nephrology, infectious diseases, endocrinology, hematology-oncology, and rheumatology. These rotations are designed to build a strong foundation in patient assessment, diagnostic reasoning, and therapeutic management.

Ambulatory and Inpatient Training

The program balances inpatient care at Mount Sinai Medical Center with robust outpatient clinic experiences. Ambulatory training emphasizes chronic disease management, preventive medicine, and continuity of care, while inpatient rotations focus on acute illness management, multidisciplinary collaboration, and procedural skills.

Didactic Education and Conferences

Structured didactic sessions supplement clinical training, including weekly grand rounds, morbidity and mortality conferences, journal clubs, and case-based discussions. These educational activities reinforce core knowledge, encourage critical thinking, and foster a culture of academic inquiry.

Faculty and Mentorship

The residency program benefits from a diverse faculty team composed of experienced clinicians, educators, and researchers dedicated to resident development. Faculty members provide personalized mentorship, career guidance, and support for scholarly activities.

Expert Clinical Faculty

Faculty physicians at Mount Sinai Medical Center of Florida are recognized experts in their respective fields, committed to delivering high-quality education and patient care. Their expertise ensures residents receive up-to-date clinical knowledge and practical skills training.

Mentorship and Professional Development

The program emphasizes individualized mentorship, assigning each resident a faculty advisor to assist with academic progress, career planning, and professional growth. Regular feedback sessions and mentorship meetings help residents navigate challenges and optimize their training experience.

Research and Scholarly Activities

Engagement in research and scholarly projects is a key component of the Mount Sinai Medical Center of Florida Program Internal Medicine Residency. The program encourages residents to participate in clinical studies, quality improvement initiatives, and academic presentations.

Research Opportunities

Residents have access to a wide range of research opportunities across various internal medicine subspecialties. Faculty mentors collaborate with residents on projects designed to enhance medical knowledge and improve patient outcomes. These projects often result in presentations at regional and national conferences or publications in peer-reviewed journals.

Quality Improvement and Patient Safety

The residency integrates quality improvement (QI) training into its curriculum, enabling residents to lead initiatives that enhance healthcare delivery and patient safety. Participation in QI projects

develops critical thinking and leadership skills essential for future clinical practice.

Application Process and Eligibility

The application process for the Mount Sinai Medical Center of Florida internal medicine residency is competitive, requiring candidates to demonstrate strong academic credentials, clinical aptitude, and commitment to internal medicine. The program participates in the National Resident Matching Program (NRMP).

Eligibility Criteria

Applicants must have graduated from an accredited medical school and hold a valid ECFMG certification if they are international medical graduates. USMLE or COMLEX scores, letters of recommendation, a personal statement, and a curriculum vitae are essential components of the application package.

Interview and Selection Process

Selected candidates are invited for interviews, during which faculty evaluate applicants' clinical knowledge, communication skills, and professionalism. The program values diversity, teamwork, and a dedication to lifelong learning in its selection criteria.

Resident Life and Support Services

Resident well-being and support are integral to the Mount Sinai Medical Center of Florida Program Internal Medicine Residency. The program fosters a collaborative environment that promotes work-life balance, mental health, and professional satisfaction.

Wellness and Support Programs

The residency offers wellness initiatives, including counseling services, stress management resources, and social activities. These programs aim to cultivate resilience and prevent burnout among residents.

Housing and Community

Residents have access to housing resources and benefit from the vibrant South Florida community surrounding Mount Sinai Medical Center. The program encourages engagement in community service and professional organizations to enhance the residency experience.

- Comprehensive clinical training in internal medicine
- Experienced faculty mentorship and career guidance
- Robust research and quality improvement opportunities
- Supportive environment promoting resident wellness
- Competitive application process with clear eligibility criteria
