Overview of TWU Physical Therapy Program

The TWU physical therapy program is designed to prepare students for a successful career as licensed physical therapists. It offers a Doctor of Physical Therapy (DPT) degree that combines rigorous academic coursework with practical clinical experience. The program emphasizes a holistic approach to patient care, integrating scientific principles with compassionate treatment methods. TWU maintains accreditation through recognized physical therapy education bodies, ensuring high educational standards. Students enrolled in the program gain a strong foundation in human movement science, rehabilitation techniques, and patient assessment. The program is tailored to meet the evolving demands of healthcare, enabling graduates to deliver effective physical therapy services in diverse settings.

Program Accreditation and Standards

TWU physical therapy is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), which validates the quality and rigor of the curriculum. This accreditation guarantees that students meet the necessary professional competencies required for licensure and practice. The program aligns with standards set by national organizations, ensuring graduates are prepared to pass the National Physical Therapy

Examination (NPTE). Maintaining accreditation reflects TWU's commitment to excellence and continuous program improvement.

Curriculum and Coursework

The curriculum of the TWU physical therapy program integrates foundational sciences with clinical application. Students engage in comprehensive study areas including anatomy, physiology, kinesiology, neuroscience, and pathology. Courses are structured to provide both theoretical knowledge and practical skills necessary for patient evaluation and therapeutic intervention. The curriculum incorporates advanced topics such as manual therapy, exercise physiology, and pain management. Emphasis is placed on evidence-based practice, critical thinking, and ethical decision-making within clinical contexts.
