United Airlines markets Economy Plus as the perfect middle ground, combining affordability with additional space and convenience.

Location within the Aircraft

On the Boeing 777-200, the Economy Plus seats are generally situated in the first few rows of the economy section, directly behind the premium cabins. This placement allows passengers to enjoy a quieter environment and easier access to lavatories and galleys. The proximity to exits also provides a slightly expedited boarding process. Legroom and Seat Pitch

One of the defining features of the united 777 200 economy plus seats is the increased seat pitch. While standard economy seats average around 31 inches of pitch, Economy Plus offers approximately 34 to 36 inches, providing more space to stretch legs and reduce fatigue on long-haul flights. Seat Dimensions and Design

The Economy Plus seats on the 777-200 typically measure about 17.3 to 18 inches in width, depending on the specific aircraft layout. The cabin lighting and noise insulation also contribute to passenger comfort in this section.

Recline and Personal Space

Passengers in the united 777 200 economy plus section benefit from an increased recline angle compared to standard economy seats.
