Initial Guess Recommendations

Choosing an optimal first guess is crucial in Wordle. For wordle 757, starting with a word that covers common vowels and consonants, such as “ADIEU” or “STARE,” can help identify or eliminate key letters early. Although these starting words do not contain letters from the answer PLANT, they provide a broad coverage of common letters, setting the stage for informed subsequent guesses.

Letter Elimination and Pattern Recognition

After the initial guess, analyzing the feedback—green for correct letter and position, yellow for correct letter wrong position, and gray for incorrect letters—is essential. For wordle 757, once a letter like “A” is confirmed, players can focus on placing it correctly while testing potential consonants. Recognizing common letter pairings and placements, such as “PL” at the beginning or “NT” at the end, can expedite solving.
