The vowel 'A' is also among the most common vowels used in five-letter words, which reinforces its strategic importance in solving Wordle puzzles.

## Difficulty Level Assessment

The word "shard" presents a moderate level of difficulty. It is not a highly obscure word, but its combination of less frequent consonants such as 'H' and 'D' at the end can confuse players who rely solely on more common letter patterns. ## Use Letter Elimination Method

Eliminating letters that do not appear in the answer helps narrow down possibilities. Paying attention to letters that turn gray in the game reduces the pool of potential words. For instance, if a player guesses "shard" and some letters are incorrect, they can cross those letters off in future attempts.

## Pay Attention to Letter Positioning

Wordle provides feedback not only on which letters are in the answer but also on their correct placement. Letters that turn yellow are in the word but in the wrong position, while green letters are correctly placed. Understanding this feedback is crucial. For example, in "shard," recognizing the correct placement of 'A' as the second letter can guide subsequent guesses.

## Expand Vocabulary
