Wordle January 31 2023 Answer Reveal

The answer for Wordle January 31 2023 was a carefully selected five-letter word that challenged many players. Revealing the word helps players verify their guesses and understand the logic behind the puzzle. The official answer for this date was **CRISP**. This word was chosen for its common usage yet moderate difficulty due to letter placement and vowel distribution.

Significance of the Answer

The word *CRISP* includes a blend of consonants and a single vowel, which is common in Wordle answers to maintain a balanced difficulty level. The presence of the letter "C" at the beginning and the double consonant cluster near the end made it a slightly challenging word for players relying on vowel-heavy guesses.

Common Player Guesses and Mistakes

Many players initially guessed words such as *CRANE*, *CLASP*, or *CLIMB* based on common starting letters and vowel patterns. However, the absence of the vowel "E" and the particular arrangement of consonants required players to adjust their guesses carefully. This often led to multiple attempts before arriving at the correct solution.

Analysis of Puzzle Difficulty and Word Choice

Wordle January 31 2023 was classified as moderately difficult compared to other daily puzzles. The word selection process involves balancing common words with enough complexity to prevent immediate solutions. This section analyzes why the chosen word fits this criterion.

Factors Influencing Difficulty

The difficulty of Wordle puzzles is often influenced by the following factors:

- **Letter Frequency:** Words with common letters such as E, A, and R tend to be easier.
